To whom it may concern,

I would happily like to recommend TJ Thomas as a candidate for this opportunity to advance his academics. I had the pleasure of being TJ's supervisor during the time he spent working at Caterpillar as a Corporate Intern.

TJ worked as an engineer within the Commercial Engine product team for 3 months (Jun to Aug 2018). He did an excellent job leading and supporting the variety of projects he was assigned. Coming to work at a large corporation can be challenging, especially for someone who has completed just a single year of college but TJ arrived and quickly adapted. He was able to work independently and needed little guidance, seeking out answers wherever needed. TJ also took the initiative to take on additional responsibility by adding 2 projects to his workload. One being a facility improvement idea that he felt strongly needed to be highlighted. TJ pulled together the appropriate summary and sought to review with the facility manager.

TJ was always very respectful and courteous, which are also highlights his positive character. Please do not hesitate to contact me to provide you with any further information regarding TJ Thomas.

Best regards,

Amy Frans
