To Whom It May Concern,

It is my pleasure to recommend Lenworth Thomas.

Lenworth is a determined, successful and well-rounded student. He is interested not only in the technical aspects of engineering design and 3D printing, but also in the business of engineering, and the skills required to be successful in the field.

Independently, Lenworth has pursued classwork, out-of-class opportunities, special projects and networking events to learn as much as he can, and to gain the skills that would make it possible for him to have an internship experience, in an engineering-related field, prior to graduating from high school. Lenworth has been successful in obtaining an internship, and his employer has been impressed with his work ethic and ability to learn quickly.

As a result of his experience in the classroom, and at work, Lenworth serves as an awesome mentor for our students. He has been willing to help students with difficult 3D printing projects. He is also an asset to me as we build our classroom makerspace.

Lenworth will be successful as he moves forward to college. I am excited to see the impact he will have as he pursues his interest.

He will be a great asset to your program, and a great representative of students to invest in for our future.

Sincerely

Faith Whittingham

Instructor, Project Lead The Way, Engineering Pathways
